

N=111 developmental closeout

Useful choice structure; limited evidence for a unique mechanism

A Friends elicit higher investment choices

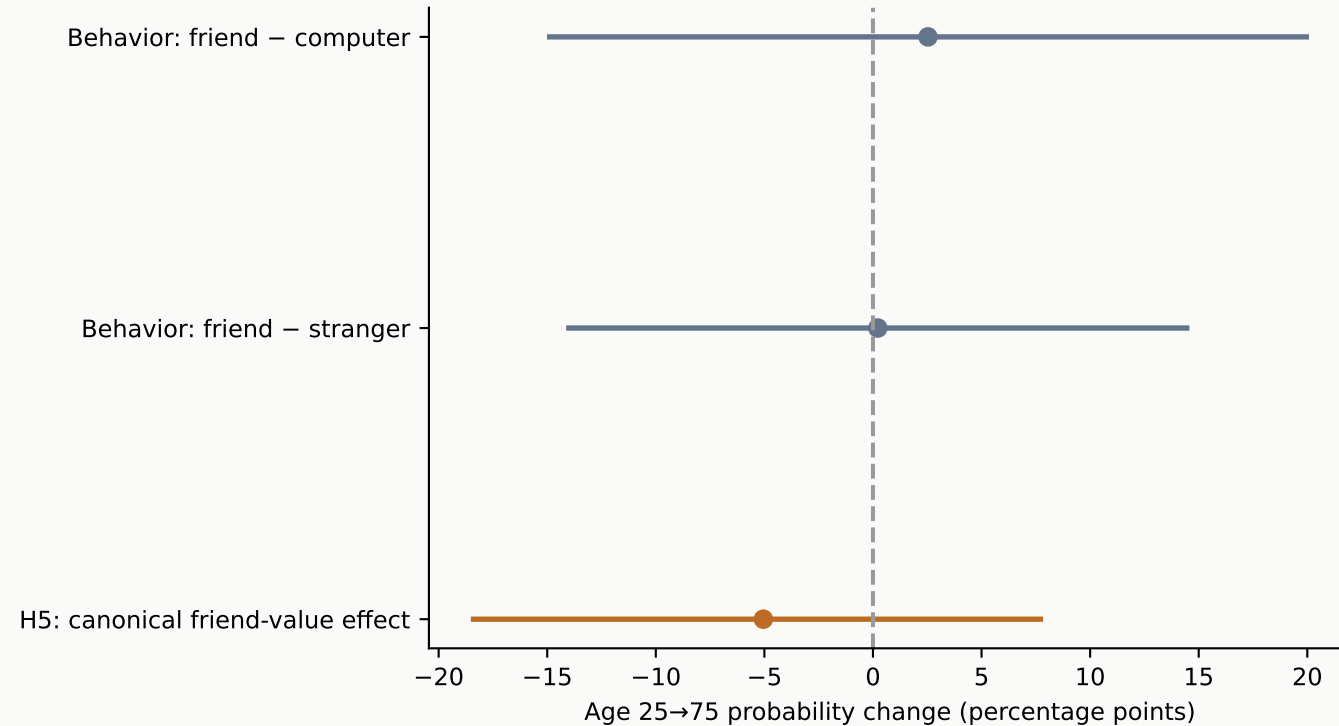

B One zero-option term improves prediction

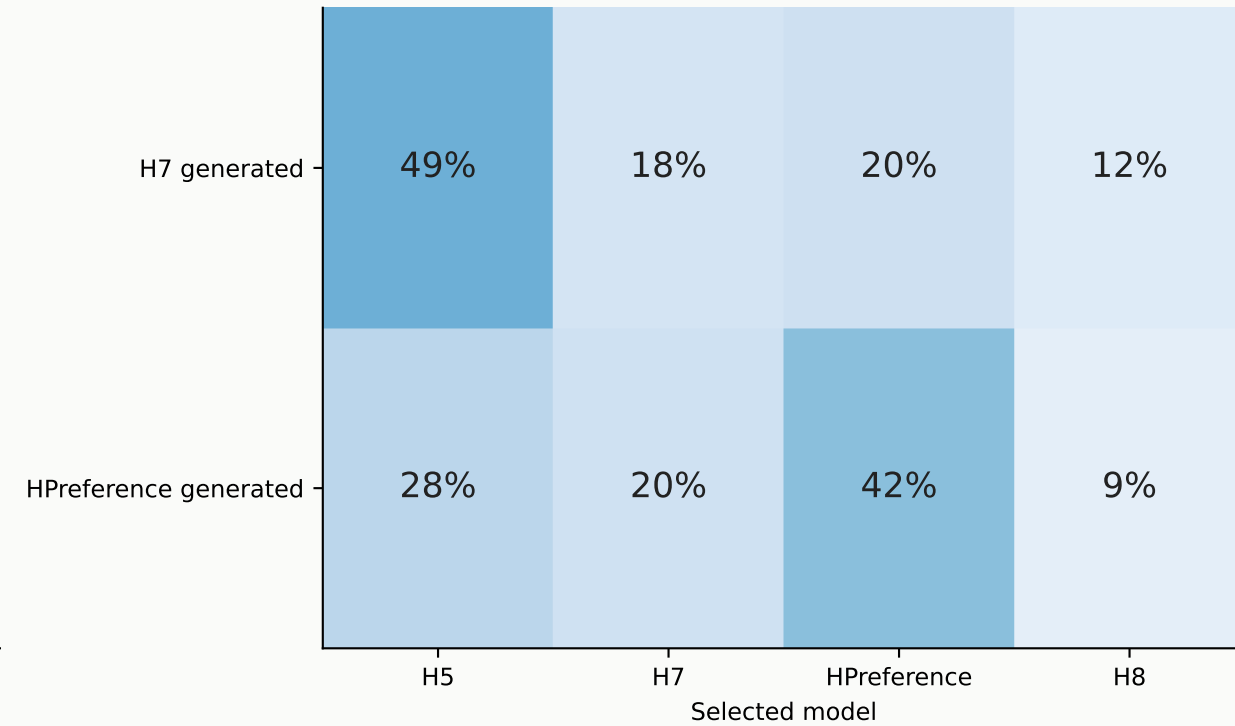

Offer-standardized paired participant bootstrap · 95% intervals

C Age moderation remains uncertain

4,017 temporal test choices · paired bootstrap 95% intervals

D Mechanism labels are often confused

Gray: GEE 95% CI · Orange: posterior 95% CrI
Different estimands; cross-sectional associations.

Individual AICc · zero-adjusted empirical generators
888 tasks per row; only 8 population draws.
